EDUCATION

University of Florida | Gainesville

Aug. 2023 – May 2027

Bachelor of Science in Computer Science, Minors: Electrical Engineering, Statistics

GPA: 4.0

Certificates in AI Fundamentals and Applications and Data Analytics

EXPERIENCE

AI Intern

Jun. 2025 – Present

Humanworks Lab | NASA Johnson Space Center (JSC)

- Spearheaded the development of an anomaly detection system for ISS ARED machine sensors, contributing to a project aimed at ensuring astronaut health and operational readiness.
- Engineered a comprehensive dashboard using Dash, Plotly, and SciPy to perform time-series analysis and statistical plotting of raw sensor data, creating a tool that is faster and more functional than the client's existing dashboard.
- Actively evaluating statistical anomaly detection methods and transitioning to supervised learning models to enhance predictive accuracy and system reliability.

AI Scholars Researcher

Oct. 2024 – Present

M.E. Rinker, Sr. School of Construction Management | University of Florida

- Developed a CTGAN synthesizer using SDV and Python, generating synthetic datasets with high fidelity to improve artificial neural network training accuracy.
- Investigated key physiological and environmental variables to enhance predictive models for heat-related illnesses in construction workers.
- Contributed to the design of an ANN framework for real-time heat strain prediction, paving the way for IoT integration in wearable devices to improve workplace safety.

System Administrator Intern

May 2025 – Present

Division of Student Life | University of Florida

- Managed technology needs for 25+ faculty, providing technical support and leading system maintenance, imaging, and deployment to ensure seamless technology integration and reliability.
- Provided hands-on assistance with Active Directory, including user account management and basic group policy tasks.
- Delivered essential technical support by performing troubleshooting for common hardware and software issues to ensure operational uptime.

PROJECTS

EvoChess | Python

Mar. 2025 – Apr. 2025

- Trained a Convolutional Neural Network on over 80,000 chess games to predict the next best move from a given board state.
- Processed and transformed chess game data into structured matrices, enhancing both model training and move prediction accuracy.
- Integrated the model with an interactive chess board using Pygame and python-chess for real-time gameplay.

Six Degress of Twitter | C++ / Crow & React

Mar. 2025 – Apr. 2025

- Designed and implemented a C++ adjacency list and traversal system using BFS and A* algorithms to explore six degrees of separation in large-scale social network graphs.
- Built a Crow-based HTTP server to return JSON responses for graph metrics and pathfinding queries.
- Collaborated on integration with a React/TypeScript frontend that visualizes connections through an interactive, force-directed graph interface.

Data-Driven Resource Optimization | Python

Jul. 2024 – Aug. 2024

- Developed a custom gradient descent algorithm to minimize the errors squared cost function for predicting event resource needs.
- Visualized cost function progression using Matplotlib and assessed model performance by calculating MAE, MSE, and R² scores with Scikit-learn.
- Integrated model forecasts into event logistics, driving a 20% reduction in resource costs and an 85% decrease in waste.

SKILLS AND ACHIEVEMENTS

Languages: Python, C++, R, Java, SQL, JavaScript, TypeScript **Tools:** Jupyter Labs, Git, Linux, PowerBI, MySQL, VS Code

Libraries/Frameworks: Scikit-learn, PyTorch, Pandas, NumPy, SciPy, Matplotlib, Seaborn, TensorFlow, SDV, React, Dash, Plotly, Statsmodels, Express.js, Node.js

Relevant Coursework: AI Fundamentals, Intro to Machine Learning, Intro to Software Engineering, Data Structures and Algorithms, Programming with Data in R, Engineering Statistics, Differential Equations

Awards: AI Scholar (2025–2026), UF President's Honor Roll (2025–Present), Machen Florida Opportunity Scholar (2023)
