

# Joseph Spagnoli

561-329-2705 | jspagnoli1705@gmail.com | linkedin.com/in/joseph-spagnoli | github.com/joeyspagnoli

## EDUCATION

**University of Florida | Gainesville**

**Aug. 2023 – May 2027**

Bachelor of Science in Computer Science, Minors: Electrical Engineering, Statistics

**GPA: 4.0**

Certificates in AI Fundamentals and Applications and Data Analytics

## EXPERIENCE

**AI Intern**

**Jun. 2025 – Present**

**Humanworks Lab | NASA Johnson Space Center (JSC)**

- Spearheaded the development of an anomaly detection system to automate the identification of ISS ARED machine sensor faults in large-scale time-series data (11,000+ data points per exercise set), aiming to drastically reduce manual analysis time.
- Engineered a comprehensive dashboard using Dash, Plotly, and SciPy, improving data analysis efficiency by 15% and enhancing readability with color-coded channels and metadata-on-hover functionality.
- Actively evaluating statistical anomaly detection methods and transitioning to supervised learning models to enhance predictive accuracy and system reliability.

**AI Scholars Researcher**

**Oct. 2024 – Present**

**M.E. Rinker, Sr. School of Construction Management | University of Florida**

- Developed a CTGAN synthesizer using SDV and Python to generate high-fidelity synthetic data, creating the foundational dataset for initial artificial neural network training in the absence of real-world data.
- Investigated key physiological (5-8 features) and environmental (12-13 features) variables to enhance predictive models for heat-related illnesses in construction workers.
- Contributed to the design of an ANN framework for real-time heat strain prediction, paving the way for IoT integration in wearable devices to improve workplace safety.

**System Administrator Intern**

**May 2025 – Present**

**Division of Student Life | University of Florida**

- Managed technology needs for 25+ faculty, providing technical support and leading system maintenance, imaging, and deployment to ensure seamless technology integration and reliability.
- Provided hands-on assistance with Active Directory, including user account management and basic group policy tasks.
- Delivered essential technical support by performing troubleshooting for common hardware and software issues to ensure operational uptime.

## PROJECTS

**EvoChess | Python**

**Mar. 2025 – Apr. 2025**

- Trained a Convolutional Neural Network on over 80,000 chess games, achieving a predictive accuracy that enables gameplay superior to a beginner player (est. 900 Elo).
- Processed and transformed chess game data into structured matrices, enhancing both model training and move prediction accuracy.
- Integrated the model with an interactive chess board using Pygame and python-chess for real-time gameplay.

**Six Degress of Twitter | C++ / Crow & React**

**Mar. 2025 – Apr. 2025**

- Designed and implemented a C++ adjacency list and traversal system using BFS and A\* algorithms to explore six degrees of separation in a large-scale social network graph of 100,000 nodes.
- Built a Crow-based HTTP server to return JSON responses for graph metrics and pathfinding queries.
- Collaborated on integration with a React/TypeScript frontend that visualizes connections through an interactive, force-directed graph interface.

**Data-Driven Resource Optimization | Python**

**Jul. 2024 – Aug. 2024**

- Developed a custom gradient descent algorithm to minimize the errors squared cost function for predicting event resource needs.
- Visualized cost function progression using Matplotlib and validated model performance, achieving an  $R^2$  score of 0.958 with Scikit-learn.
- Integrated model forecasts into event logistics, driving a 20% reduction in resource costs and an 85% decrease in waste.

## SKILLS AND ACHIEVEMENTS

**Languages:** Python, C++, R, Java, SQL, JavaScript, TypeScript **Tools:** Jupyter Labs, Git, Linux, PowerBI, MySQL, VS Code

**Libraries/Frameworks:** Scikit-learn, PyTorch, Pandas, NumPy, SciPy, Matplotlib, Seaborn, TensorFlow, SDV, React, Dash, Plotly, Statsmodels, Express.js, Node.js

**Relevant Coursework:** AI Fundamentals, Intro to Machine Learning, Intro to Software Engineering, Data Structures and Algorithms, Programming with Data in R, Engineering Statistics, Differential Equations

**Awards:** AI Scholar (2025–2026), UF President's Honor Roll (2025–Present), Machen Florida Opportunity Scholar (2023)
